

Minnesota Data Share Update

As announced by your REALTOR Associations, the Minnesota MLS data share program "SASI" ended April 30.

We are pleased to announce that the participating REALTOR Associations now have an alternative method for sharing MLS listings with offers of compensation included. This sharing is available through the Find application, available to you as a NorthstarMLS core service.

To access Find, select it from the External Links box on the Matrix home screen:

 [Find \(Search National Listings!\)](#)

Within Find, search your desired area, for example Duluth. On the listing detail pages, you will find a link like this:

LISTING INFORMATION	
Property Style	SF Single Family
MLS name	Duluth
MLS number	6016206
Listing Date	5-27-2015
Welcome Northstar member!	View Details in Duluth

Click the link to open an MLS report that includes the offer of compensation.

Association listings currently available with this link are the Duluth Area Association of Realtors and the Realtors Association of Southern Minnesota (Mankato).

Other Association MLS listings that will be added soon are: West Central (Willmar), Greater Alexandria, Northwest Minnesota (Bemidji), Lakes Region (Fergus Falls) and Southeast Minnesota (Rochester). We will update you as these become available.

As of now, members of these Associations can view NorthstarMLS listing reports (including the offer of compensation) in Find.

We understand this solution is not as convenient as being able to search and view the listings directly within NorthstarMLS, but we are pleased to be able to offer it as an alternative (to having nothing) to help you do business in Minnesota across the arbitrary boundaries between MLS's.

For help using Find, open the Find application and click the Help link in the upper left corner of the screen:
