

## Notes from the AAC Meeting Monday, April 23, 2018

1) It looks like we will be adding MyFloodStatus as a core service. No cost to MLS and it gets us \$5 off \$30 reports. Seems like a pretty decent program.

2) New product considerations include:

a: BDX as search tool for new construction that also includes compensation cooperation agreement. Just in initial phase.

b: Restb.ai - interesting program that detects items in photos (wood floors, vaulted ceilings, etc.). Once again, very beginning stages.

3) Add/edit changes continue to launch. Upcoming items come: Listing can be in both "To Be Built" and "Lots and Land"

Open houses interface changed and Media/Supplements will be changed soon.

4) "Coming Soon" category continues to be lively discussed. It will go to Board if Governors for consideration once again.
